FLOORING SYSTEMS

Flotex; the unique floor covering

A floor covering that looks and feels like a carpet without any of the drawbacks of a carpet. Flotex has a smooth, velour like surface that is comfortable to walk on, warm underfoot with excellent slip resistant and acoustic properties.

Flotex is extremely durable and will retain its appearance for many years. It can be cleaned using standard cleaning equipment and as the flocked fibres are firmly anchored into a waterproof backing, it's possible to clean right down to the base of the pile.

*Sanitized® is a registered trademark of SANITIZED AG License No 2893.04

Improving both your environment and that of the Earth

Hygiene, air quality and the environment are more important than ever. Many products offer one of these properties but often at the expense of another important property. With Flotex you can have it all.

Flotex; the hygienic option
Flotex offers a warm, comfortable, hygienic floor

covering that's suitable for any commercial specification. Thanks to the highly effective anti-microbial treatment "Sanitized", Flotex offers constant protection against bacteria, including MRSA, E-coli and the development of dust mites. The Sanitized treatment is compounded into the backing of Flotex, continually refreshing the anti-microbial performance without degradation through cleaning or vacuuming,

Flotex combines the practicality of a resilient flooring with the slip resistant and acoustic properties usually associated with textiles. Being completely waterproof, Flotex is also the only truly washable textile floor covering. It can be cleaned at 100°C for rapid steam disinfection.

Nylon 6.6 flocked pile
Adhesive layer containing Sanitized® anti-microbial agent
Migration of Sanitized® anti-microbial agent into pile and backing

Flotex; for improved air quality

Flotex is allergy approved
Flotex is approved by Allergy UK as it's proven to have a positive impact on the lives of allergy sufferers. It has the ability to trap allergens and then safely release them to standard cleaning appliances. When cleaned, Flotex releases twice as many allergens compared to the cleaning of conventional carpets. More harmful allergens are removed, creating a more comfortable environment for asthma and allergy sufferers. Flotex is treated with Sanitized® which suppresses the growth of house dust mite populations (dermatophagoides pteronyssinus) - even in

places where it is difficult to reach for thorough vacuuming. Independent tests demonstrate that a dust mite population introduced to a sample of Flotex with Sanitized® is reduced by an average of 86% over an 8 week period.

Flotex designs, a world of a difference
Flotex designs are printed on the smooth, even fibre surface creating a wide variety of colourways and designs that enhance the professional or playful environment of offices, schools or health care institutions.

Flotex; creating better environments - recycled tile backing

As a responsible manufacturer we share your ambitions for a sustainable world. We fully comply, as a minimum, with current environmental legislation and are fully committed to overcoming the environmental challenges facing our industry.

We constantly strive to find effective ways to minimize our consumption of resources while producing high performing products with a long lifecycle. We have almost completely eliminated our use of landfill by installing the first recycling plant of its kind to convert pre-consumer waste from many

of our production sites into a high performance Flotex carpet tile backing. Today this facility processes nearly 50 tonnes of waste a week.

Besides the environmental advantages, this tile backing also gives a highly durable product which will last for many years.

flotex® silica

Create sophisticated interior moods with Flotex silica, a linear design in a distinctive collection of muted earth and mineral tones. It brings tranquillity to the modern office environment, conference centre or atrium.

Soiling classification

In circumstances where the design of the entrance system is inadequate for the level of traffic or unsuited to the type of soiling entering the building, dirt and moisture may be carried onto the surface of the interior floorcoverings, in this case, onto the Flotex tiles. Flotex tiles are able to 'hide' soiling to a greater or lesser degree depending on their colour and design. Using objective testing methods, we have graded every one of the Flotex tiles within this brochure on their ability to hide 'general' dirt. The result of these tests is a soiling classification which is shown alongside each product reference number in the following pages of this brochure.

-  Superior appearance rating
-  Good appearance rating
-  Moderate appearance rating

Flotex tile size 50x50cm

flotex® samoa

Flotex samoa is a vivid graphic design in a range of striking contemporary colours. This design is fun yet practical and works well in education and hospitality environments. The design can be installed in either chequerboard or broadloom style.

Soiling classification

In circumstances where the design of the entrance system is inadequate for the level of traffic or unsuited to the type of soiling entering the building, dirt and moisture may be carried onto the surface of the interior floorcoverings, in this case, onto the Flotex tiles. Forbo FloorCare method

Flotex tiles

A regular cleaning programme will minimise the need for major restorative maintenance.
Avoid excessive use of cleaning products. If used, rinse them out thoroughly, as remains may attract dirt.

Cleaning after installation

- Vacuum clean the floor using an upright vacuum cleaner with a powered brush
- Remove stains or spills locally using clean warm water
- Always work from outside inwards
- Remove excess water
- Allow the floor to dry

Regular cleaning

- Vacuum clean the floor using an upright vacuum cleaner with a powered brush
- Remove stains or spills locally using clean warm water
- Always work from outside inwards
- Remove excess water
- Allow the floor to dry

Occasional maintenance

- First soak stains locally by spraying with a solution of mild detergent
- Scrub with plenty of warm water, using a machine for carpet wet cleaning with brush action
- Allow the floor to dry

Forbo Flooring Systems is part of the Forbo Group, a global leader in flooring, bonding and movement systems, and offers a full range of flooring products for both commercial and residential markets. High quality linoleum, vinyl, textile, flocked and entrance flooring products combine functionality, colour and design, offering you total flooring solutions for any environment.
